FOR A MORE BEAUTIFUL WORLD by Lawyer Dicle

Hello, I am Dicle. Today I will tell you my story, where the reason for choosing my dream profession began. It was summer. While walking on the road, I saw two people fighting. I went to them and tried to calm them down. The child who was right was very scared and crying. I want to be a lawyer to defend people who are right like that child and make them happy.

THE PURSUIT OF HAPPINESS by Dr. Sevval

I was walking in the park with my mom. The weather was so nice that the park was quite crowded. We sat on a bench with my mom. While sitting, I saw a woman. She suddenly fainted. People around immediately called the ambulance. The ambulance came quickly and took the woman to the hospital. I got curious and said to my mother: "Mom, what do doctors do?" And my mom said, that they'll do everything to heal us, so we can get better." Her words touched me very much and from now on, I wanted to become a doctor and heal people.

WE ARE COMPUTER ENGINEERS by Computer engineers Emir and Fevzi

At school, our teachers gave us a presentation about artificial intelligence and programs. Then they taught us how to use it. We were very excited that there were a lot of applications on the computer and that they could be easily applied. We decided to become computer engineers so that we could make better software and programs.

I'M A CAR MECHANIC by Car Mechanic Kadir

When I was little, I loved playing with toy cars. If the wheel came off, I would put it on, and if it was scratched, I would paint it. Briefly I would repair the car. Now I still love cars very much. I enjoy repairing them. That's why I wanted to choose this profession. One day, I would also like to design a car that I have drawn myself. I hope I can achieve my dreams.

GOOD TEACHER by Teacher Mustafa

One day, while my English teacher was teaching, she told me how well I understood the lesson. This sentence made me so happy that I started coming to every lesson with more excitement and realized that I really had a talent for languages. I want to improve this skill and become a very good teacher in the future.

ANIMALS by vet Elif

I was playing with my friends in a school garden. Suddenly I saw a cat having difficulty walking. When I went to it, I saw that something had stuck in its paw. I immediately told my teacher about that problem. My teacher called the vet and asked for help. The vet took such good care of the cat that it recovered and continued running in the school garden. After this happening, I decided to become a vet and heal all animals.

eTwinning day 🧡💙
